Father's Dilemma.

A parent's life is one long responsibility. It's a wonder that so many of the genus discharge their duties so acceptably. A writer in the Cleveland Plain Dealer has discovered another parental problem, or perhaps he merely calls attention to one which many fathers have discovered for themselves.

"How's the family?" one inquired of a happily married west sider yesterday.

"Well, my children are at a difficult age now."

"Difficult? Why, they've all passed the measles and teething stage, have they not?"

"Long ago. But you don't know father's troubles. My children are at the age where if I use slang my wife says I'm setting a bad example, and a back number. Which would you

In a Japanese Sleeping Car. It was at night we had our first experience in a Japanese sleeping car. The track is narrow gauge, and the standard sleeping cars have six seats running lengthwise, each seating two passengers, with a center aisle. The upper berth is the regular Pullman style, and a section will accommodate two passengers. The night was during the extreme heat of midsummer, the car was crowded, and in addition to the regular curtains each berth was provided with a mosquito bar, which added to the general discomfort. Passengers were taken on and let down at all stops, so there was a constant procession through the aisle all night Part of the car was reserved for local accommodation, and those who sat up smoked incessantly, so that long before morning the atmosphere became intolerable.-Railway Age Gazette.

Submarines at Sea.

Equilibrium is almost as difficult to aintain for a submarine vessel as for wager.—London Sketch. an aeroplane. With modern large submarines the act of diving is performed when the vessels have headway. The bow is depressed by horizontal rudders, and the vessel moves obliquely downward. The desired depth having been attained, the steersman must so manage the horizontal rudders that the vessel shall practically maintain its level; but, in fact, its course becomes really an undulating one. There must be no movement of men or weights in the vessel without immediate compensation to restore and maintain the balance, else the submarine may dive to a disastrous depth. Manual control has been found better than automatic control,

Mesmerism.

Frederick Anthony Mesmer, the founder of mesmerism, was a German physician of Merseberg. His thesis setting forth the science of mesmerism was published in 1766. Mesmer contended that the heavenly bodies diffused through the universe a subtle fluid, which acts on the nervous system of all animated beings and especially upon that of man. He gained a great number of followers and realized a splendid fortune. A committee of physicians and "philosophers" investigated his pretensions, which were finally exposed in 1784. Notwithstanding this, however, Mesmer continued to have many friends and followers, so great was the personal "magnetism" of the man.

Superstition That Is Ancient. In many parts of Great Britain the superstition still survives that it is folly to save a drowning man, as be will sooner or later do an injury to the rescuer. The superstition comes down from our ancestors, yet traces of it exist among the Sioux and other Indians, who seem to have inherited it from aboriginal sources. The belief is most prevalent in Cornwall and various parts of Scotland.

One crisis in Lord Palmerston's life illustrates the absolute good humor which may prevail even when political enmity is at its worst. Lord Derby had made an attack upon him in the upper house with such energy and eloquence that the odds against him seemed overwhelming. But he defended himself and his policy from the dusk of one day to the dawn of anforce of appeal to the national sense of Foss. honor that he was acquitted of all blame by a majority of fourscore.

Next day in passing through the corridor leading from an antercom to the upper house one swing door opened to his hand and at the same moment the other to that of Lord Derby. They were opponents, but they were also manly and sweet natured men. They smiled.

"I was just thinking," said Palmerston, "what a clever fellow he was who so nearly put me in a hole!"

"Ah." was the rejoinder, "but nothing like the cleverness of the fellow who got you out of it!"

Winning a Bet.

Lord Marcus Beresford is, like all the Waterford family, full of high spirits. There is but one person entitled to drive down Rotten row-the Duke of St. Albans-and it is doubtful if ever he cares to exercise the privilege. But Lord Marcus bet he would do it in broad daylight and without interference. The wager was accepted and the time fixed for the adventure about noon. All Lord Marcus' friends came trooping along to see him, but time went on, and nothing could be seen of the sportsman.

By and by a watering cart came along, driven by the usual waterman in a smock. As the car passed along leisurely the driver smiled, and on closer observation Lord Marcus' friends recognized the winner of the

A Window Washer's View.

A window washer was called upon one day to clean the windows of a business concern on the nineteenth floor of a skyscraper in lower Broadway. The cleaner paused in wonderment as he passed through the lines of typewriter operators as they clicked off their correspondence and went to the window and fastened the two straps dangling from his belt to hooks at the side of the window frame. He cast another surprised glance at the men operating the typewriters, and as he swung outward over the dizzy height, his weight sustained by the slender straps, he muttered:

"It's mighty odd how some people do make their living in this world anyway?'-New York Herald.

The Greatest Traveler.

By migrating from pole to pole the arctic tern becomes the greatest traveler in the world and also manages to enjoy more daylight than any other bird. It has been found nesting within 500 miles of the pole. When the young are grown the entire family leave for the south and some months later are found skirting the edges of the antarctic. As the daylight season draws to a close in the far south the long journey north is undertaken.

A Privilege Usurped.

"I understand Casey, the contractor, is having trouble with his wife," said Mr. Rafferty.

"What about?" inquired Mr. Dolan. "I think it's a kind of jealousy. Casey came around with a black eye that she didn't give him."-Exchange.

A Fishy Romance.

Mabel-So Jack Miller didn't marry Miss Herring after all? Judith-No. She rejected him. Mabel-How did Jack take it? Judith-Oh, he said there was as good fish in the sea as were ever caught out of it and went after Miss Salmon.

Mrs. Dresser-But, George, you surely don't consider yourself a financier? Mr. Dresser-Certainly I do. How do you suppose I've kept from paying your milliner's bill for so long if I'm not a financier?-Catholic Standard and Times.

Matrimonial Note.

"This thing of getting married," said the girl who was busy with her trousseau, "is certainly a trial."

"A trial, yes," agreed the cynical bachelor, "but it isn't half so bad as working out the sentence."-Town
